DAY 05 OF 05

POWER RESET

Turn five days of work into game-ready power.

GOAL
POWER

TIME
20–25 MIN

05

> Rapidly convert all your resetting into game-ready power. This is what the first four days were building toward. Land soft. If anything pinches, stop and get it checked. Absorb first — then explode. Don't crash into the ground and hope. The power comes from control, not force — the same principle as every day this week.

> **WHY THIS DAY**
