DAY 03 OF 05

MOVEMENT CONTROL

03

Where the hips and ankles start talking.

GOAL
CONTROL

TIME
20–25 MIN

Improve control, coordination, and pain-free movement so your body moves efficiently on the court. Hip and ankle work is done — now those two start talking to each other. Movement control is the part most hoopers skip; they go straight from stiff to heavy lifts and it never transfers, because they never taught the body to move with control first.

WHY THIS DAY

Control is the part nobody trains. I got range back long before I moved like I trusted it, and that gap is the whole reason this day exists.

RESET BLOCK Carry over from Days 1 + 2

01 90/90 HIP LIFT

4 BREATHS

Exhale fully. Reset your breathing pattern.

02 ANKLE ROCKS

2 × 8 EACH

Slow drive. Knee tracks over the toe.

03 GLUTE BRIDGE HOLD

2 × 20 SEC

Squeeze at the top. Breathe through it.

MOVEMENT BLOCK Direction changes with control

04 CONTROLLED JOG → STOP → CHANGE DIRECTION

3–5 REPS

Take your time. No rushing the change. Decelerate — don't crash.

CONTROL BLOCK Stability under load

05 DEAD BUGS

3 × 8 EACH SIDE

Low back stays flat the whole time. Slow and deliberate. Breathe on the way down.

06 STEP-UPS (CONTROLLED)

3 × 6 EACH LEG

Drive through the heel. Don't push off the back foot. 3 counts up, 3 counts down.

07 SPLIT SQUAT HOLD

3 × 20 SEC EACH LEG

Stay tall. Front knee tracks the toe. Breathe.

08 SINGLE-LEG BALANCE REACH

2 × 6 EACH SIDE

Slow reach in each direction. Control the return. Don't rush.

WHAT TO LOOK FOR

↑ More coordination in movement ↑ Better balance under control ↑ Smoother direction changes

FOCUS Move controlled — every rep. Stay balanced. No rushed reps, ever.

Keep it going after the Reset — **BTH Stay Ready** · **$27/mo** · **built-to-hoop.com/join.html**
