

DAY 05 OF 05

POWER RESET

Bring the bounce back — the right way.

05

Day 5. The bounce protocol. Not another round of box jumps that trash your knees — reactive power from a base that's actually been reset. You've earned this.

TODAY'S PROTOCOL

01 HIP RESET RECAP

FULL DAY 1 SEQUENCE · 1 ROUND EACH

Run through all three Day 1 exercises once before loading any power work. This is the activation sequence — hips firing means power transfers. Skip it and you're leaving bounce on the floor.

02 BOX STEP-UP + DRIVE

3 × 6 EACH LEG

Step onto a box (12–18 inches), drive the opposite knee up hard at the top. Controlled step down. This is hip extension power — the same movement pattern as your first step.

03 BROAD JUMP + STICK

4 REPS · FULL RESET BETWEEN EACH

Jump forward as far as you can, land on two feet and STICK it for 3 full seconds. No wobble, no extra steps. Quality over distance. This trains the landing mechanics that let you jump again without pain.

NOTE Also your readiness check: do the Day 1 hip sequence again after this session. If you're looser than you were Monday, that's the BTH method working.
